Services

Building construction:

We offer construction of commercial and residential buildings.

From single-family homes to apartment buildings, as well as industrial projects.

Infrastructure construction:

TOLT Construction can build from light projects to heavy civil engineering projects, such as highways, streets and bridges. We are prepared to construct foundations, act as contractors for pouring concrete, steel, precast and masonry works.

Other services:

Drywall, insulation, flooring, building finishes, site preparations and much more.

About

TOLT Construction started in 2013 in the construction industry and has been growing step by step, referred by the community for its quality work. Since 2013, we have maintained our vision and business practices. Potential customers are met by one of the companies' directors, and we maintain routine personal visits throughout the course of the project, ensuring quality is maintained during all stages of construction.

Commitments made at preconstruction are carried throughout the course of the project and into the future, until it has been completed satisfactorily. Our personal involvement ensures every job is completed on time, within budget and enduring levels of quality.

We are defined by our ethics, seriousness, promptness, dedication and communication, as well as quality in all our endeavors. Our company has a Minority Business Certification MB.
